

Contribution to society by Wireless Communication and Information Systems

Building a More Secure, Comfortable Society by Using Communication Technology

Invisible "lines" establish connections.

- **Connecting the lifelines** Disaster-prevention and firefighting wireless system networks that ensure the safety and security of society.
- **Connecting businesses** Railroads, airports, taxis, and all other scenes of business are made more secure and efficient.
- **Connecting locations of ubiquitous computing**
A public wireless infrastructure supports convenient and comfortable mobile communication

Product Profile

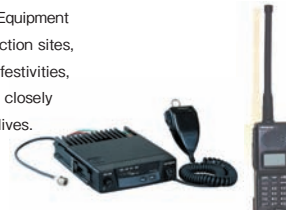

Digital Municipal Disaster Management Communication Systems

In the event of an earthquake, typhoon, or other natural disaster, these systems convey warnings and messages from municipal authorities. Under normal conditions, such systems are useful in public relations.

Commercial Radio Equipment

Commercial Radio Equipment is active on construction sites, in taxis, at airports, festivities, and other situations closely related to our daily lives.

Systems related to mobile phone base stations

Various kinds of infrastructural equipment for mobile phones are useful in making society more convenient and comfortable.

Wireless broadband systems

Wireless data communication systems can be used to easily build a fast communication system between locations even in areas where a cable line is difficult to lay.

Securities and financial solution systems

These systems establish a database of customer information to help conduct comprehensive analysis and solve problems involving trading errors and compliance.

RF-ID systems^{*1}

These systems use shelf antenna control technology to be active in library book management and various other areas of commodity management.

Building an Affluent Society by Using Information Technology

- Network-based display technology is used to provide the latest information useful in daily life.
- Processing and analysis technology for information is used to enhance customer service and ensure fair-trade.

Library book management systems

General enterprises

Over-the-counter display systems

Sales strategy support system, call center system

Information systems

Securities and financial enterprises

Product Profile

Goyo Electronics Co., Ltd.

Goyo received an award for their urgent shipment for restoration purposes in response to Hurricane Katrina.

Goyo Electronics received an award bearing the official state stamps of four southern states in the USA from their customer in June 2006, for the company's urgent production and shipment of 10,000 critical communication radios for restoration purposes in response to devastating Hurricane Katrina. The award says, "Your exceptional dedication and service were invaluable in accomplishing the mission of supporting first responders in their rescue and recovery efforts."

Topics

Integrated Study for Akita Commercial High School

A total of 39 students and teachers from Akita Commercial High School visited the Tsurunumadai Works of Goyo Electronics Co., Ltd. The students were imaginary part of the "Intellectual Properties Section" of "Akisho Co., Ltd.," a simulated corporate organization used during hours of Integrated Study of the school. They listened attentively to explanations given by specialist personnel about how private companies use their patents and similar rights, the purpose of these patents and rights, the importance of intellectual property to a corporation, and other topics. We wish to continue contributing to society by emphasizing communications with our neighbors.
